

SENIOR PRODUCT DESIGNER

Elżbieta Bojarczuk

I'm a product designer who pairs UX metrics, data, and research with a strong bias for clarity, consistency, and scalable patterns in complex flows. I use AI-augmented design thinking to explore more directions early—scenarios, variants, and faster sense-making—then ground decisions in evidence through testing, analytics, and research, keeping people, accessibility, and trust at the center. I love UX's human side and a good story, whether I'm telling it or listening. I also mentor UX designers on Instagram.

Experience

Jun 2021 - present | OLX Group

SENIOR PRODUCT DESIGNER/UX Designer

I joined OLX Group in the Delivery OLX Pay&Ship team and I am now in the OLX Jobs area. I address all aspects of the problem phase to the delivery phase, including UI design and UX strategy. I work directly with the product team to prototype, design, and deliver the best user experience using a product discovery process. I collaborate closely with data analysts and UX researchers. Metrics and user insights drive my design.

Sep 2016 - May 2021 | XTB DM S.A.

UX LEAD/SENIOR UX DESIGNER/UX DESIGNER

For investors, I created complex tasks that are intuitive and simple to use. I established and managed user experience projects across multiple platforms for B2B and B2C users.

I included the all UX aspects of the xStation app and website, including user research, frameworks, and design strategy. I oversaw and coached a group of three designers. In addition, I did some Design Ops functions, such as designer hiring and onboarding.
